PCS Bot usage

1. Download & install node.js here: https://nodejs.org/en/download/

2. Unzip the bot to a desired location

3. On the unzipped folder, right click to an empty location and click open powershell on this folder

4. On powershell write `npm install`

5. Configure the bot to your liking

6. Run `npm run start` to start the bot.

7. To stop, click `Ctrl + C`

```
{
  "provider": "wss://bsc-ws-node.nariox.org:443",
  "mnemonic": "XXXXXX", <---- write your mnemonic that you got from metamask*
  "slippagePercentage": "10",
  "approveBeforeTransaction": true, <---- approves the amount at the starting of the bot
  "buyImmediately": true, <---- true if liquidation is there and you want to directly buy it.
  "amountInEther": "0.0001",
  "addresses": {
    "WBNB": "0xbb4cdb9cbd36b01bd1cbaebf2de08d9173bc095c",
    "targetToken": "0xe9e7CEA3DedcA5984780Bafc599bD69ADd087D56", <---- token address that you want to snipe
    "factory": "0xcA143Ce32Fe78f1f7019d7d551a6402fC5350c73",
    "router": "0x10ED43C718714eb63d5aA57B78B54704E256024E",
    "recipient": "XXXXXX" <---- your account address
  }
}
```

*: Your first account of the mnemonic should have the balance.
